

Xwind at Airventure 2008

August 6, 2008

Wow! Oshkosh 2008 has come and gone already!

Xwind had a prominent spot in the Redbird Flight Simulations booth.

Over 120 pilots took a test drive of the Xwind product. Serial number 006 was sold at the show and installed in Minneapolis on August 4, 2008.

About 100 pilots attended the Xwind forum on crosswind landings.

Many pilots were looking for training and several were looking to install Xwind as part of their training offering at their local airports.

The airshow and weather were great and interest in the Xwind solution was fantastic!
